

Cloud Computing

Managed Services Delivered

Managed Services

On Demand - Always Available

Servers • Storage • Application • Security • Client

Which cloud is right for you?

Private	Public
Ability to have control over your cloud	Applications and storage available to the public
<ul style="list-style-type: none"> • Elasticity: If there is an increase in demand on IT systems, private clouds can scale to meet these demands. • Control: Control over your data so you know all information is secure within the cloud. • Low capacity: Pooling resources lets companies reduce computing capacity by giving higher-priority tasks more power during peak periods. • Reduces overhead • Preparation: Private clouds today can help companies prepare for the future of cloud computing services. 	<ul style="list-style-type: none"> • Fast server provisioning by increasing service, storage and other computing needs • High redundancy and availability • Very reliable • Simple and inexpensive set-up because all hardware, applications and bandwidth are paid for by the provider • Scalable to meet individual or company needs • Only pay for what you use

About Expedient

Expedient is part of a network of nationwide data centers which offer a wide range of managed services and network connectivity. These proven managed services combined with reliable and redundant SAS 70 Type II Certified and PCI-DSS compliant data centers, interconnected with a private 10Gbps network, enables Expedient to deliver premier colocation, network and managed services to enterprise, commercial, education and government entities.

Redundant Virtual Server Farm

Organizations choose to use cloud computing solutions because this method increases capacity and capabilities without having to invest in additional hardware. Users are able to avoid investing in infrastructure because cloud computing involves the deployment of virtual resources. When partnering with Expedient, customers can expect:

- Quick, affordable provisioning of servers
- Power, cooling, racking, stacking and cabling become a non-issue
- Qualified and experienced professionals to provide network, hardware, OS management and backups
- Redundancy, monitoring, help desk services and accountability

Advantages

- 100% SLA backed availability
- 24x7 accessibility
- *On-demand scale:* pay only what you use
- *Maintained by:* experienced and trained Expedient staff able to help your business better leverage cloud services

The greatest benefit of cloud computing is that users only pay for the resources needed, as they are used.

Available Services

- Virtual Colocation / Cloud
- Managed Virtual Instances
- Managed Backup
- Colocation
- Managed System Services
- Managed Network Services
- Monitoring
- Load Balancing
- Firewall
- Managed Exchange Email

Data Center Locations:

- Baltimore
- Boston
- Cleveland (x2)
- Columbus
- Indianapolis
- Pittsburgh (x2)
